## Rashidbek Xoldarov

**ACCOMPLISHMENTS** I've been learning front-end web development for a year and able to work with single, multi-page applications. In my projects, I have completed a wide range of tasks such as crud operations, connecting Web APIs to the back-end, animating react components, converting Figma designs to web pages, writing reusable codes for better performance, responsive design, state management with context api, form validation and submission, authentication, and many more. I feel comfort with working React ecosystem since it uses virtual dom which makes easy life of client-side developers.

---

### SKILLS & ABILITIES **Hard skills:**

- HTML5, CSS3, SCSS, Bootstrap5, tailwind
- Javascript(OOP, Promises, Event loop, Objects,RegExp)
- React Ecosystem (Hooks, Routes (protected), Authentication,CRUD operation) Context-API (state management)
- Axios (data receiving + requesting)
- Styled-Components, Material-Ui (for design implementation)
- Git, GitHub
- Swagger + Postman (confident enough to understand)
- English Lang: (Intermediate)
- Russian Lang: (Elementary)
- Uzbek Lang: (Native)

### **Soft Skills:**

Critical Thinking, Time Management, Math, Problem Solving, Effective Communication, Awesome Teammate

---

### PROFESSIONAL EXPERIENCE

#### **Software Engineer Intern, Uz Auto Motors full-time**

Dates from March 2022 - To June 2022

- Oversaw Both hardware and software development.
  - Pulled from JavaScript, knowledge to booster functional programming skills.
  - Enhanced OOP concept from team leads in several conferences
  - Clear understanding of how database system works.
-

---

## EDUCATION

### **Andijan Machine Building Institute (Andmi) – ANDIJAN, UZBEKISTAN – BACHELOR DEGREE (2018-2022)**

During Academic period of 2018-2022, I was able to collect **GPA-4.90** with successful degree specialized in **Software Engineering**.

High enthusiasm motivated to participate in **Robotics competition** (2021). Which enabled me to perform smart house project by utilizing **Arduino (C language)**

Fundamental knowledge of **Java, C++** languages in academic period

### **Najot Ta'lim – Tashkent, UZBEKISTAN – (2022 June)**

First **3 month** (strong introductory level of landing and multiple pages)

Next **4 month** (Concept of JavaScript language, understanding how JS works behind the scene - event loops, call stack, OOP)

Rest of Month (React ecosystem)
